EDUCATION

State University of New York at Oswego

Bachelor of Arts in Information Science | Oswego NY

Dec 2026

GPA: 3.59

President's List: 2 Semesters; Dean's List: 3 Semesters

Minor in Computer Science and Applied Statistics

SKILLS

Coding Languages:

Oracle Java, JavaScript, Hypertext markup language HTML, Cascading Style Sheets CSS

Statistical Analysis:

R, Minitab

Database Management:

Microsoft Access, Structured query language SQL, MySQL, Microsoft Office

Data Analysis:

Tableau, Microsoft Excel

PROJECTS

mySQL University Database

Nov 2025 - Dec 2025

- Optimized query performance by creating indexes on frequently searched columns, improving data retrieval efficiency for large datasets.
- Developed and executed advanced SQL queries using JOINS, GROUP BY, and aggregate functions to compute course enrollments, total credits, and multi-instructor collaborations.
- Designed and implemented relational database schema with multiple tables, primary/foreign keys, and indexes to efficiently manage faculty, student, course, and enrollment data.

Microsoft Access Restaurant Database

Sep 2025 - Oct 2025

- Collaborated among a small group to design and develop a functional database in Microsoft Access to model how restaurants handle utilizing a database management system to ease organizational load.
- Directed the logical and physical levels of the database to demonstrate good design principals.
- Designed relational tables and implemented referential integrity using primary and foreign keys
- Presented project deliverables and documentation to demonstrate the system's real-world applicability

EXPERIENCE

Senior Peer Mentor

State University of New York Oswego Financial Aid | Oswego NY

Aug 2024 - Present

- Spearheaded 10+ financial literacy presentations for freshmen, improving participant financial knowledge by 20%.
- Conducted 1-on-1 financial aid consultations, assisting over 50 students in optimizing financial aid packages.
- Enhanced phone-based customer service skills by resolving over 100 student queries monthly.
- Performed organizational tasks on Microsoft Office Suite as needed to improve workflow for senior employees.

COURSEWORK

Database Management Systems

Aug 2025 - Dec 2025

- Designed, analyzed, and built relational database diagrams to visualize data flow and prepare for accurate physical implementation.
- Built functional queries, tables, reports, and forms in Microsoft Access to model real-world database operations and improve data organization.
- Utilized DDL and DML statements to build, modify, and manage databases with precision and adherence to best practices in SQL.

Telecommunications

Jan 2025 - May 2025

- Demonstrated proficiency in core telecommunications concepts (e.g., bandwidth, latency, routing), supporting accurate analysis of modern network performance and limitations.
- Interpreted and analyzed common networking protocols (e.g., TCP/IP, HTTP), enhancing ability to diagnose communication processes between systems.
- Utilized Wireshark to capture and analyze live network traffic, identifying protocol behavior across layers and strengthening understanding of real-world device communication.
- Analyzed packet-level data using Wireshark, interpreting TCP/IP interactions and diagnosing communication patterns between networked systems.
